Bo-Jyun Wang

Taoyuan, Taiwan · contact@bojyunwang.me
Google Scholar · Website · GitHub

Research Interests

Knowledge Distillation; Representation Learning; Training Dynamics; Efficient Deep Learning.

Education

National Cheng Kung University **Tainan, Taiwan**
B.S. in Computer Science and Information Engineering — GPA: 4.03 / 4.30 *Sep. 2022–Jan. 2026*

Research Experience

Research Assistant **Feb. 2026–Present**
Artificial Intelligence Research Center, Chang Gung University *Taoyuan, Taiwan*

- Investigated the effectiveness of different distillation signals for encoder–decoder models in abstractive summarization.
- Applied Shapley-value analysis to quantify the contribution of individual distillation signals and their combinations.
- Findings: across different distillation signals, encoder hidden states are the only signal that consistently yields stable, harmless gains; the resulting first-author manuscript is currently being revised for resubmission.
- Analyze how layer-wise representation geometry evolves from pre-training through post-training and incorporate these representation trajectories into knowledge distillation.

Undergraduate Researcher **Feb. 2024–Jan. 2026**
IKM Lab, National Cheng Kung University *Tainan, Taiwan*

- Developed SCURank, an SCU-based framework for ranking candidate summaries in multi-teacher distillation.
- Evaluated the framework across multiple datasets and evaluation measures; the resulting work was published in *Findings of ACL 2026*.

Undergraduate Researcher **Sep. 2024–Jun. 2025**
BAISP Lab, National Cheng Kung University *Tainan, Taiwan*

- Evaluated MRI harmonization and compact 3D-CNN architectures for multi-site Alzheimer's disease classification; the resulting work was presented at iFUZZY 2025.

Publications & Manuscripts

1. **SCURank: Ranking Multiple Candidate Summaries with Summary Content Units for Enhanced Summarization**
   Bo-Jyun Wang, Ying-Jia Lin, and Hung-Yu Kao
   Findings of the Association for Computational Linguistics: ACL 2026. [Paper]

2. **Integrating Harmonization with 3D-CNN Improves Multi-Site MRI Classification**
   Bo-Jyun Wang and Hui-Ling Chan
   International Conference on Fuzzy Theory and Its Applications, 2025.

3. **Hidden States Matter: Distilling Encoder–Decoder Models in Abstractive Text Summarization**
   Bo-Jyun Wang and Ying-Jia Lin
   Manuscript under revision.

Teaching & Leadership

NLP Group Leader **Sep. 2025–Jun. 2026**
GDG on Campus, National Cheng Kung University *Tainan, Taiwan*

- Led a group of 5–15 students, developed course materials, and delivered six classes.
- Led a university-supported project to develop a retrieval-augmented generation chatbot for answering international students' administrative questions.

Technical Skills

Programming & ML: Python, C/C++, PyTorch, Hugging Face Transformers, scikit-learn
Tools: Git, Linux, Docker, GCP, LaTeX
Languages: Mandarin Chinese (native), English (IELTS Academic: 7.0)
